

# PORCELANOSA FACADE/

Alta LIC  
Tower

# Alta LIC Tower

Manhattan, NY

Alta LIC is a 44 story high-rise luxury building that has over 460 residential units within it. Located in Long Island City area of Queens, New York, this building has emerged as one of the tallest in the area and one of the tallest in the world with porcelain panels. The building is located near multiple subway and train lines, and the overall ventilated façade design helps to soundproof the building from the bustling trains that pass by and overall noise outside. Designed by Stephen B. Jacobs Group, Alta LIC features Porcelanosa's textured and dimensional Cubica Black panels, which are primarily used near the ground levels and entrances of the building, while the bright Extreme White porcelain panels soar and extend up the unique ventilated façade design.

Architect	<b>The Stephen B. Jacobs Group PC</b>
